SUMMARY

Java Developer with 4.5 years of experience in enterprise application development specializing in Java, Spring Boot, and RESTful API development. Experienced in building scalable backend services, implementing business logic, and improving system performance across large applications. Skilled in debugging complex issues, optimizing application code, and participating in major system initiatives such as Java 8 migration. Strong collaborator with experience in code reviews, mentoring developers, and working with cross-functional teams to deliver reliable and high-quality software solutions.

WORK EXPERIENCE

System Engineer, Tata Consultancy Services **March 2023 - Present**

- Developed RESTful APIs using Spring Boot to dynamically provide backend data based on user inputs.
- Contributed to three major software projects, focusing on backend development, data integration, and scalable system design.
- Performed core Java development tasks including debugging, code optimization, and database interactions.
- Led and mentored developers through code reviews and technical guidance, improving code quality and team efficiency.

Executive Software Developer, Ameliorate Consultancy Services Pvt Ltd **Sept 2021 - Feb 2023**

- Contributed to the migration of enterprise applications to Java 8, performing code updates and resolving compatibility issues to ensure a smooth transition.
- Developed and enhanced application features based on business requirements, implementing changes in backend modules using Java.
- Performed in-depth debugging and troubleshooting to identify root causes of application issues and improve system stability.
- Created and maintained JUnit test cases to validate functionality and ensure code reliability during development and migration.

EDUCATION

Master of Computer Science **2018 - 2020**

Pune University

Bachelor of Computer Science **2015 - 2018**

Pune University

ADDITIONAL INFORMATION

- **Programming & Frameworks:** Java 8+, Spring Boot 4, Spring MVC 5
- **API & Testing:** RESTful API Development, JUnit 5
- **Database & Tools:** DB2, SQL, Git
- **Development Practices:** Agile / Scrum, Code Review, Application Debugging & Troubleshooting
